

PRAKHAR SAXENA

AI Platform & Engineering Leader • Strategy, People & Operational Scale

prakhar-saxena.com | prakharsaxena.social@gmail.com | (267) 234-1604 | linkedin.com/in/prakhar-saxena | Royal Oak, MI 48067

LEADERSHIP PROFILE

Engineering and AI platform leader who solves enterprise business problems through **People, Process, and Technology**. Currently lead a 20-person organization—principal and senior engineers, senior business analysts, a product owner, and a team lead—owning the long-term strategy, roadmap, and delivery of UWM’s enterprise AI automation platform. Built that platform from the ground up into the company’s largest deployment of Google LLMs, generating multimillion-dollar annual savings and returning over a million workhours to the business. Scrum.org Certified Professional Scrum Master driving outcomes across cross-functional Agile teams.

SIGNATURE IMPACT

- **\$4.1M+** in annualized savings from a single tactful platform optimization (\$346K / month).
- **1M+ workhours** returned to the business each year: ~10 hours/week across ~2,000 underwriters, roughly 500 full-time work-years of capacity.
- **20-person org** led directly, including senior/principal engineers and a team lead—leadership scope typical of a Director / AVP.
- **Enterprise-first AI platform** conceived and built from zero; now the largest enterprise use case of Google LLMs at UWM.

CORE COMPETENCIES

Leadership & Strategy: People Management • Long-Term Strategy & Road mapping • Org Building & Mentorship • Product Ownership • Agile Leadership (Scrum, Kanban) • Operational Efficiency • Stakeholder Alignment • Complex Problem Solving

Technical: Artificial Intelligence • Machine Learning • Large Language Models (Google Gemini, Embeddings) • Application Architecture & System Design • Google Cloud Platform (Cloud Run, GKE, BigQuery) • Python • Kubernetes • Apache Kafka • AWS • Terraform • CI/CD • Language-Agnostic Engineering

PROFESSIONAL EXPERIENCE

United Wholesale Mortgage (UWM)

Pontiac, MI

Team Leader — AI Platforms & Product Development

Jul 2024 – Present

Lead a 20-person organization—principal and senior software engineers, senior business analysts, a product owner, and a team lead—owning strategy, roadmap, and delivery of UWM’s enterprise AI automation platform, showcased in its flagship product, BOLT.

- Conceived and built UWM’s document-interrogation automation platform from the ground up—now the largest enterprise deployment of Google LLMs at the company—converting manual, document-heavy underwriting reviews into real-time, AI-driven decision support.
- Delivered ~\$4.1M in annualized savings (\$346K/month) from a strategic platform optimization, with additional millions realized through loan-quality and underwriter-efficiency gains.
- Returned ~1 million+ underwriter hours per year to the business—10 hours/week across ~2,000 underwriters—the equivalent of roughly 500 full-time work-years of reclaimed capacity.
- Set and drove long-term strategy and tactical execution, applying a People–Process–Technology approach to scale AI automation adoption across the IT organization.
- Generalized the platform beyond mortgage into a reusable automation service capable of handling any document-based review requiring complex question answering.

- Architected ML solutions using Google Gemini, custom-trained models, and embeddings to automate Title Review, Assets, Purchase Agreements, Pay Stubs, Credit Reports, and Appraisals.
- Served concurrently as Product Owner (vision, prioritization, iterative roadmap) and Scrum Master (Agile delivery, team alignment, incremental releases) at the platform inception. Scrum.org Certified — PSM I.

Software Developer III

Mar 2024 – Jul 2024

Member of the BOLT Architects team; led multiple product- and organization-critical initiatives.

- Drove currency-management efforts that reduced technical debt and eliminated security vulnerabilities across multiple BOLT services.
- Led a cohort of summer team members through a full stack microservices project (React + .NET 8), achieving a 75% retention rate.
- Acted as technical liaison to vendor partners (Qarik/Egen), owning environment setup and integration, mentored junior and senior developers across frameworks and tooling.

Data Platform Engineer II

Mar 2023 – Mar 2024

- Administered an on-premises Confluent Kafka platform at 99.99% availability, processing billions of messages daily across the organization's intranet.
- Supported 1,900+ technology professionals integrating with Kafka, Redis, and Qlik; ran the Redis distributed cache platform at ~4,000 operations/second.
- Pioneered open-source Kafka adoption to cut vendor dependency and migrated Kafka connectors into Kubernetes via custom Python tooling, partnering with the server team on highly available designs.

NASDAQ

Philadelphia, PA

Software Developer

Sep 2019 – Mar 2023

- Sole maintainer of a full-stack trading application ecosystem at 99.999% availability within an AWS Kubernetes cluster.
- Designed and built Java/Spring gateways bridging legacy trading frameworks to NASDAQ's consolidated Fusion platform; introduced Scala/Java code generators leveraging a domain DDL file system.
- Delivered back-end services integrating multiple international NASDAQ exchanges and markets through transatlantic (US–Europe) collaboration.

EDUCATION

B.S. in Computer Science, Drexel University — College of Computing & Informatics 2021

Honors College (Pennoni) • Cum Laude, GPA 3.65/4.0

Minor in Data Science

Concentration in Artificial Intelligence • Concentration in Computer & Network Security

LICENSES & CERTIFICATIONS

- **Leadership Excellence** — United Wholesale Mortgage (UWM), 2026
- **Professional Scrum Master I (PSM I)** — Scrum.org, 2025
- **EMERGE Leadership** — United Wholesale Mortgage (UWM), 2024
- **Leadership Essentials, Professional Certification** — Cornell University, 2023
